Book Creator Information and Tips

- Using Book Creator, students create multimedia books that can incorporate video, music (from iTunes), text, audio recordings and images.
- You can combine books in Book Creator. However, the books that you are combining need to have the same layout. For more information, visit: <http://support.redjumper.net/entries/24273451-How-to-combine-books>.
- Export as a PDF or iBook file. However, you will lose the interactive features when exporting as a PDF.
- Another option is to convert books to video. This way, the iBooks can be shared with video and audio features in tact. For more information, visit: <http://redjumper.net/blog2/2013/07/01/3-easy-steps-for-teachers-to-convert-ibooks-into-video/>.

Uses

- Four Compelling Ideas for Using iBooks by: Chris Loat. Visit: <http://www.redjumper.net/blog/2013/10/4-compelling-ideas-using-book-creator-classroom/>.
- Photo journal of field trip
- Digital journal of learning
- Digital portfolio
- Storybook creation
- Publish student writing pieces
- Tour or guide books
- Math challenges and riddles
- Science or social studies reports
